

AUT

Land Use Regulation

NZWRI Seminar Series

Little research has focused on how land use regulations (LURs) interact with inherent characteristics to affect property values. This seminar will explore the effect of upzoning (i.e., a relaxation of restrictions on residential density) on property values using a rich dataset of residential sales transactions.

2 February 2018

11.30am – 1pm

WF710

Researchers: Ryan Greenaway-McGrevy,
Gail Pacheco, and Kade Sorenson
